

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

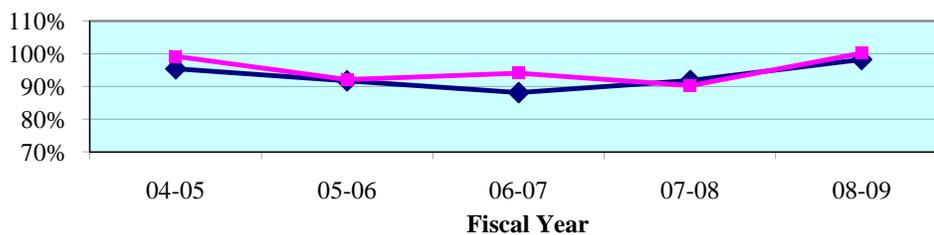

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| First Circuit | 86.0% | 92.4% | 99.2% | 107.6% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| First Circuit | 97.8% | 115.5% | 112.9% | 131.6% |
| State Median | 99.7% | 106.3% | 101.8% | 110.5% |

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

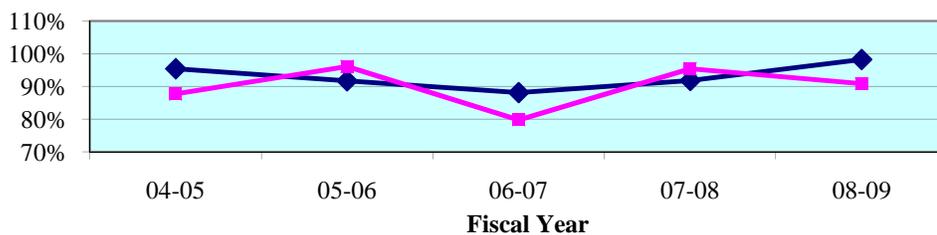

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Second Circuit | 88.8% | 97.6% | 92.7% | 92.1% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

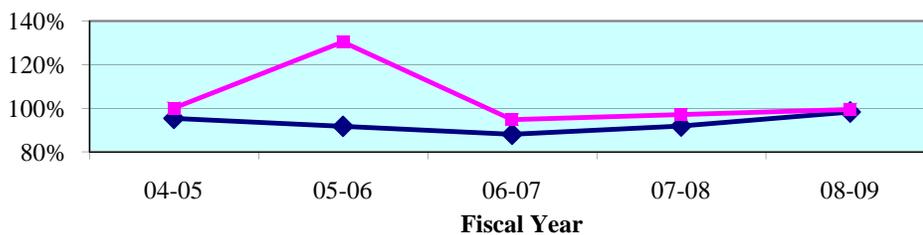

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Third Circuit | 82.5% | 87.6% | 93.8% | 100.0% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

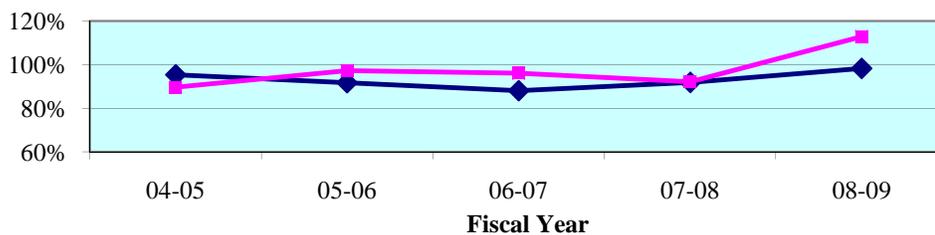

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Fourth Circuit | 90.3% | 102.2% | 103.8% | 96.3% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

Notes: Traffic data is not included in calculations.

Fiscal year data were extracted from a static data base and represent the official trial court statistics. Quarterly data were extracted from a dynamic data base and may be amended by the Clerk of Court.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

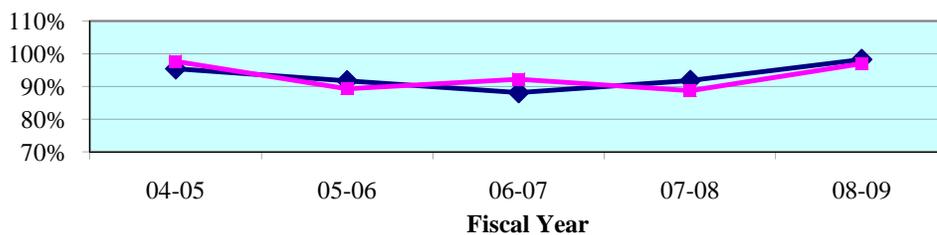

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Fifth Circuit | 85.7% | 99.1% | 100.2% | 117.6% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

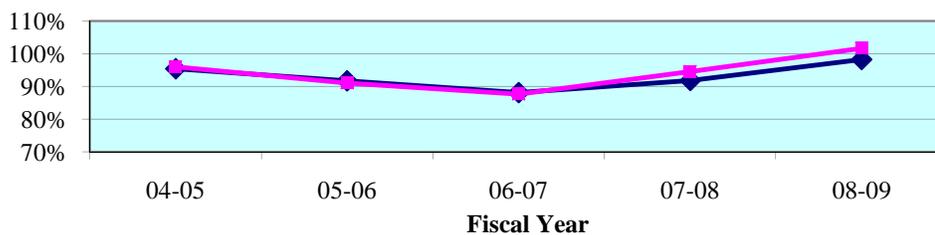

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Sixth Circuit | 86.5% | 102.0% | 105.6% | 108.5% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

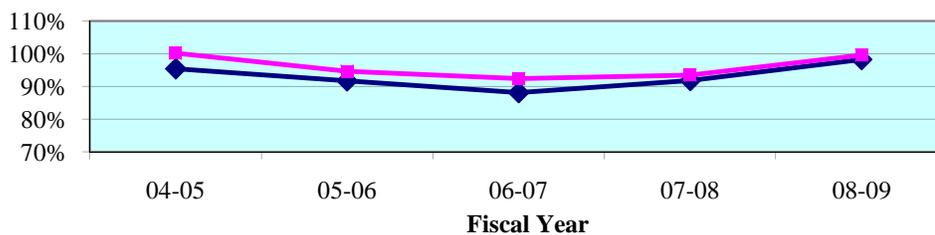

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Seventh Circuit | 84.4% | 94.6% | 105.9% | 101.8% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

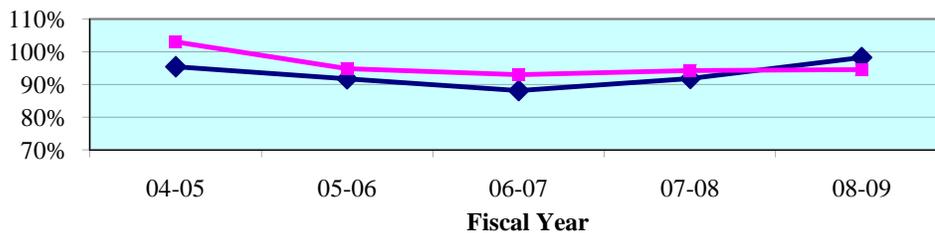

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Eighth Circuit | 85.7% | 87.3% | 97.1% | 116.1% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

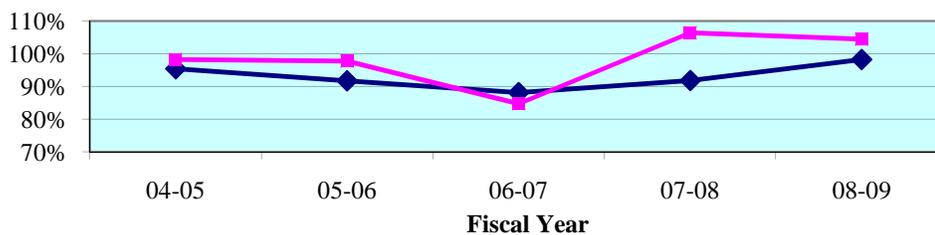

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Ninth Circuit | 89.6% | 101.6% | 106.6% | 106.0% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

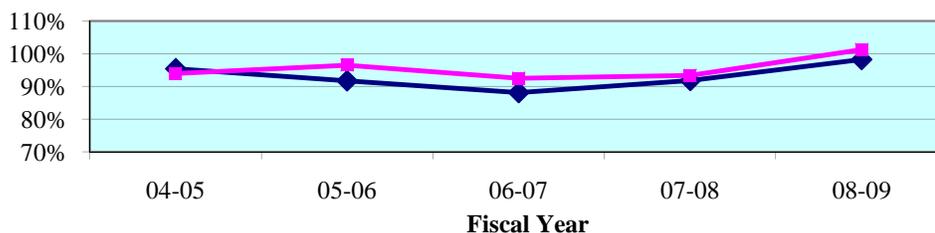

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Thirteenth Circuit | 84.3% | 93.1% | 127.4% | 102.6% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

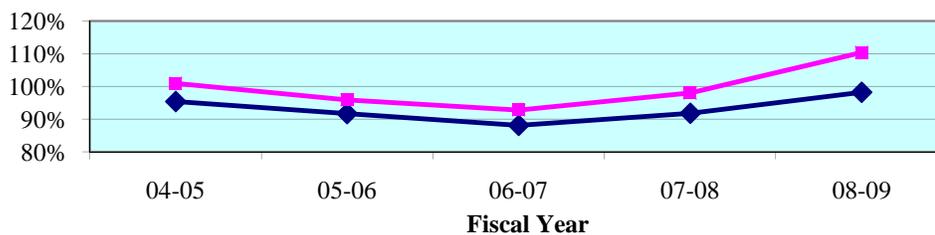

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Fourteenth Circuit | 75.7% | 94.6% | 95.4% | 105.1% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

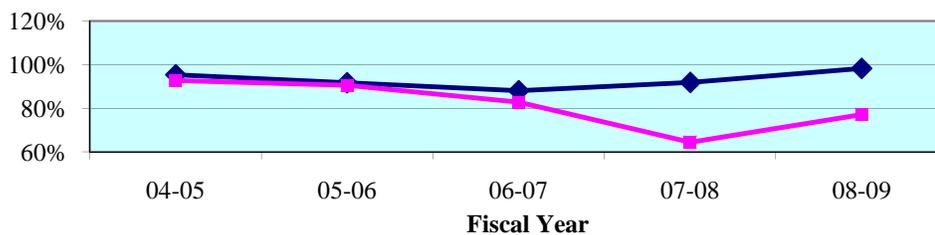

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Seventeenth Circuit | 98.1% | 99.2% | 103.3% | 100.2% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

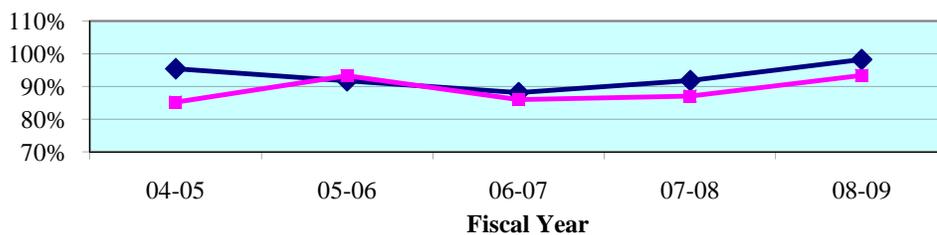

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Eighteenth Circuit | 72.3% | 80.6% | 77.0% | 109.9% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

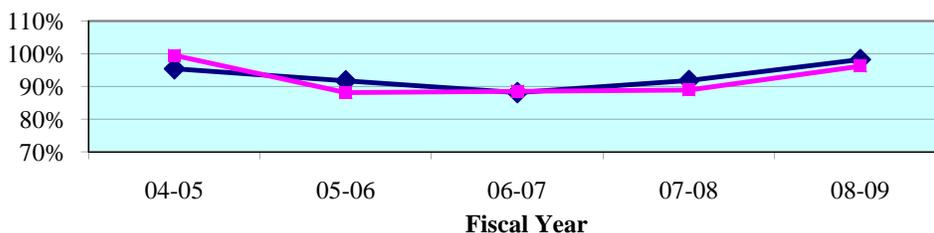

Circuit Court - Quarterly Data*

| Quarterly Clearance Rates | Jan - Mar 2010 | Apr - Jun 2010 | Jul - Sep 2010 | Oct - Dec 2010 |
|---------------------------|----------------|----------------|----------------|----------------|
| Twentieth Circuit | 111.9% | 117.5% | 140.6% | 126.8% |
| State Median | 85.7% | 94.6% | 101.7% | 105.6% |

*Termination of Parental Rights petitions are not included in calculations.
