

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

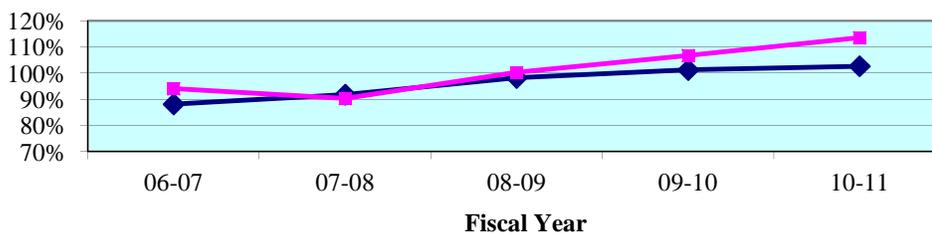

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
First Circuit	106.1%	118.0%	101.4%	86.7%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

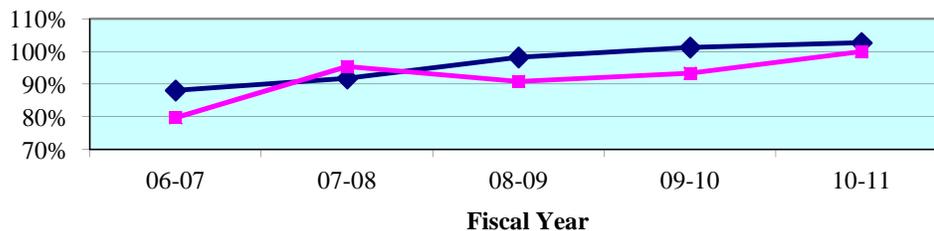

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Second Circuit	95.2%	97.0%	88.7%	93.3%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

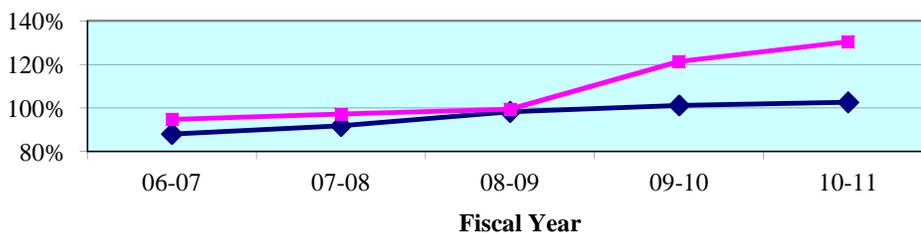

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Third Circuit	102.7%	99.6%	85.9%	95.9%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Third Circuit	114.3%	105.9%	112.3%	111.7%
State Median	100.5%	104.9%	97.5%	100.2%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

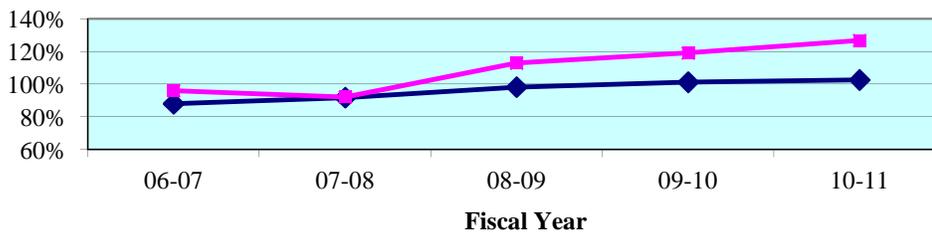

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Fourth Circuit	114.3%	118.3%	104.3%	100.8%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Fourth Circuit	108.9%	177.5%	96.8%	90.3%
State Median	100.5%	104.9%	97.5%	100.2%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

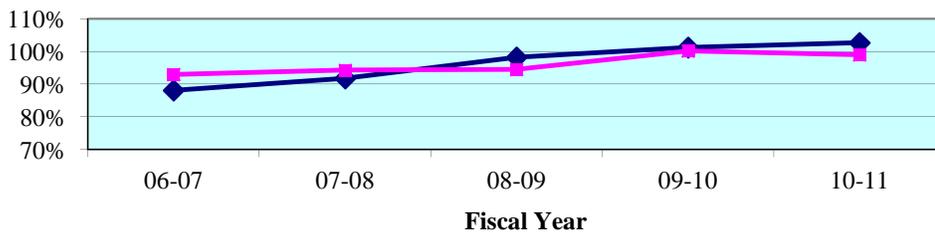

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Eighth Circuit	98.7%	101.8%	98.4%	92.2%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

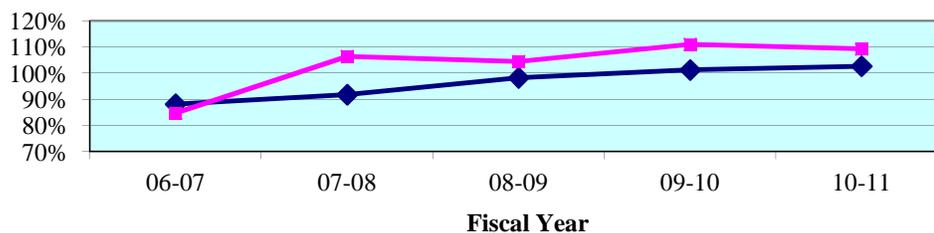

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Ninth Circuit	104.8%	112.3%	94.0%	91.2%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

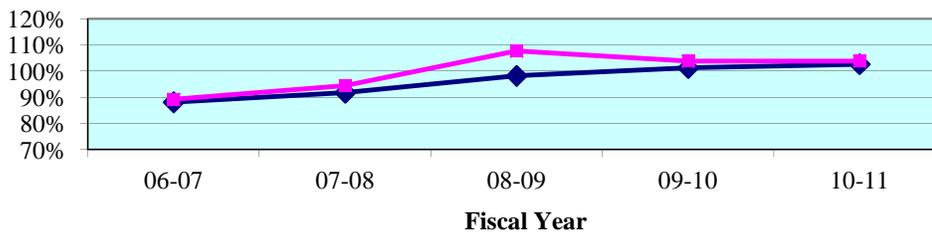

Circuit Court - Quarterly Data*

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

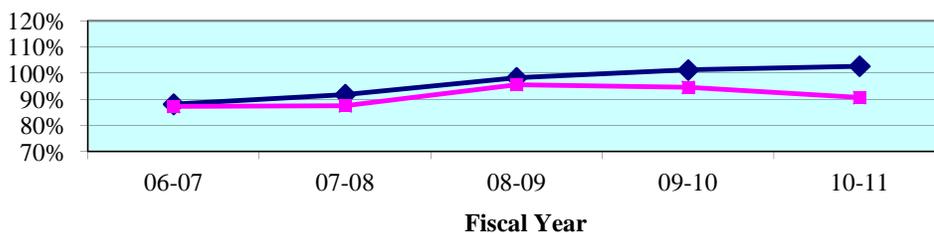

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

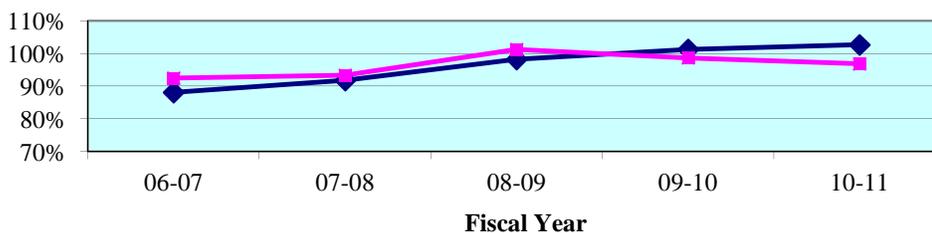

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Thirteenth Circuit	103.1%	103.8%	101.9%	100.8%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

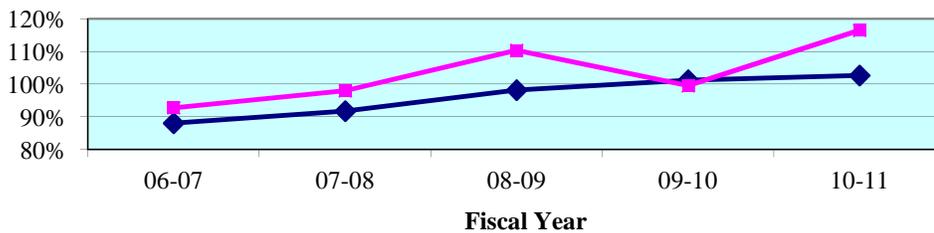

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

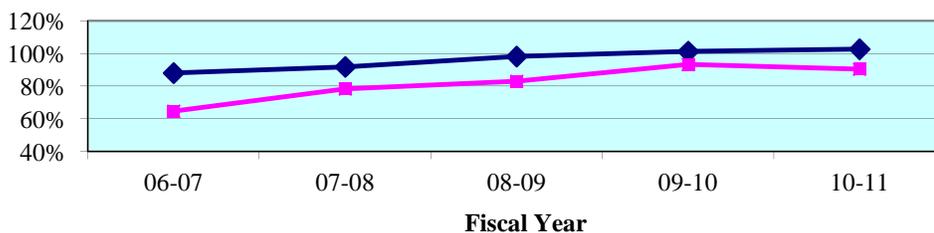

Circuit Court - Quarterly Data*

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

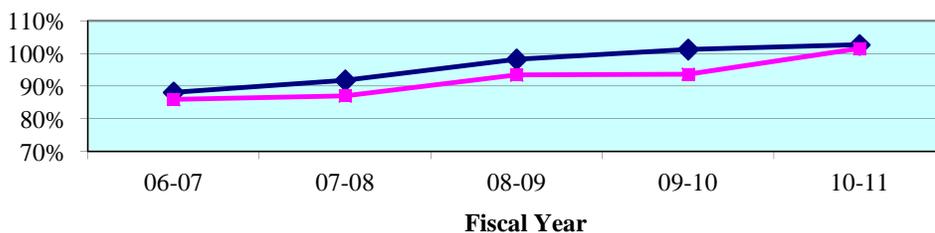

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Eighteenth Circuit	99.4%	107.3%	90.9%	98.2%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

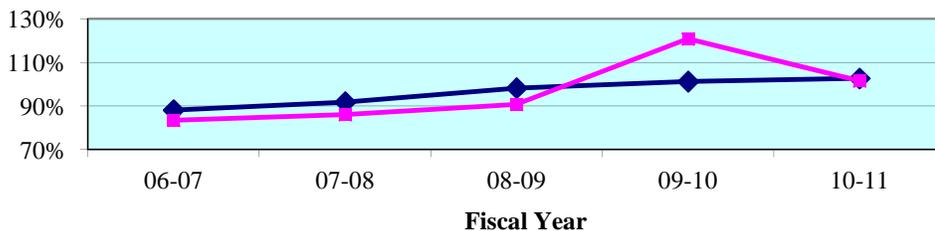

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Nineteenth Circuit	112.0%	129.2%	100.4%	112.2%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Notes: Traffic data is not included in calculations.

1. Traffic data is not included in calculations.
2. Fiscal years 2006-07 to 2010-11 and quarters Jan-Mar 2011 to Apr-Jun 2011 were extracted from a static data base and represent the official trial court statistics. Quarterly data for Jul-Sep 2011 and Oct-Dec 2011 were extracted from a dynamic data base and may be amended by the Clerk of Court.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

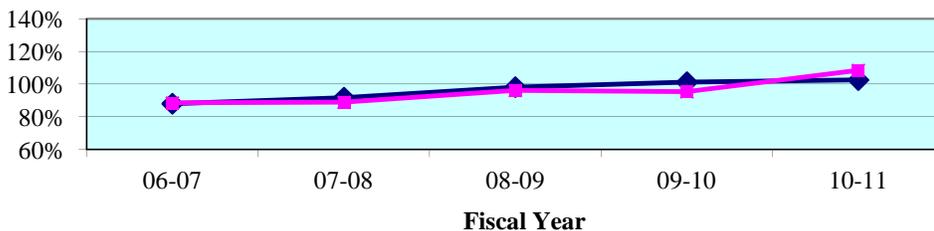

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Twentieth Circuit	142.8%	136.8%	104.9%	95.1%
State Median	104.0%	105.7%	98.5%	96.5%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jan - Mar 2011	Apr - Jun 2011	Jul - Sep 2011	Oct - Dec 2011
Twentieth Circuit	113.4%	119.9%	98.6%	113.6%
State Median	100.5%	104.9%	97.5%	100.2%

**Traffic data is not included in calculations.
