

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

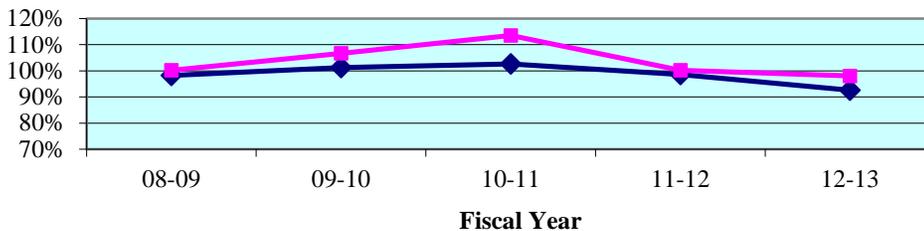

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
First Circuit	96.0%	105.5%	108.8%	107.8%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
First Circuit	89.8%	110.0%	92.2%	103.9%
State Median	92.5%	96.7%	88.4%	96.0%

**Traffic data is not included in calculations

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

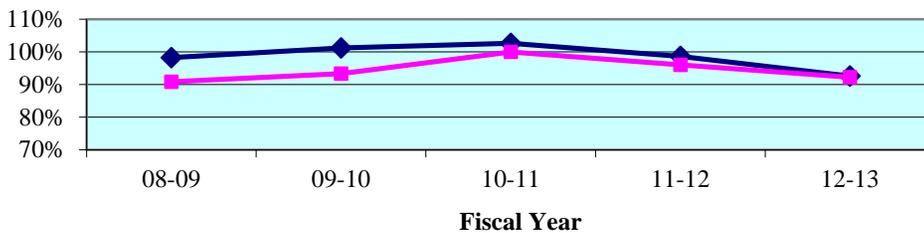

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Second Circuit	106.4%	87.7%	105.0%	109.2%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Second Circuit	92.6%	94.9%	94.7%	95.6%
State Median	92.5%	96.7%	88.4%	96.0%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

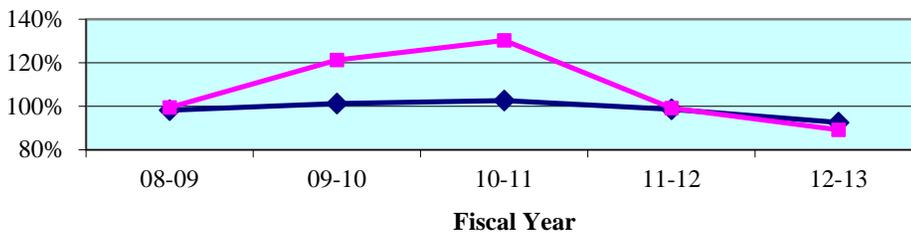

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Third Circuit	81.2%	93.3%	91.0%	89.0%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

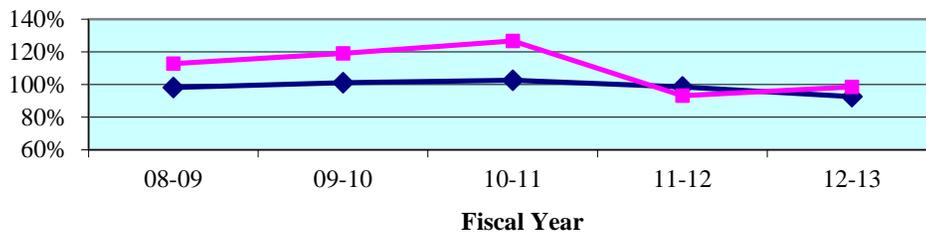

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Fourth Circuit	96.8%	119.5%	128.7%	114.0%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

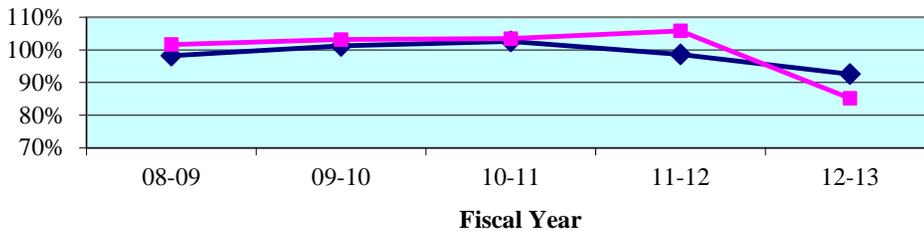

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Sixth Circuit	95.4%	102.8%	112.7%	112.4%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

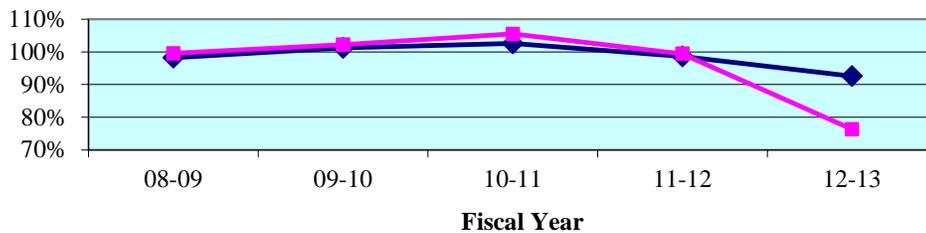

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Seventh Circuit	89.7%	91.1%	102.3%	102.7%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Seventh Circuit	59.6%	57.2%	53.9%	66.0%
State Median	92.5%	96.7%	88.4%	96.0%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

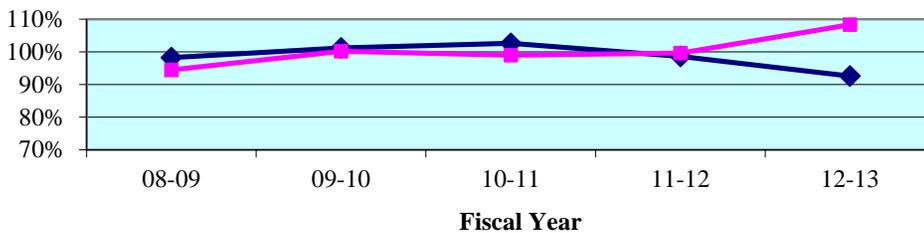

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Eighth Circuit	86.9%	92.6%	103.3%	107.8%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

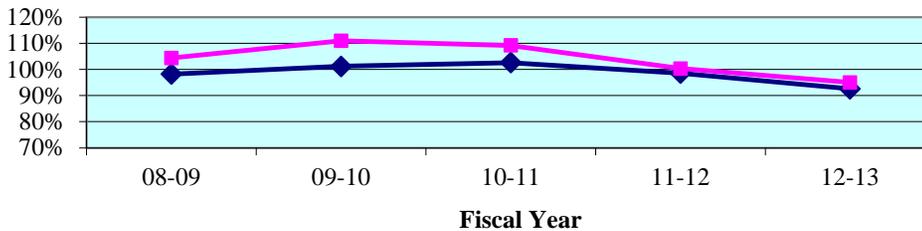

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Ninth Circuit	114.9%	121.6%	122.6%	124.9%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

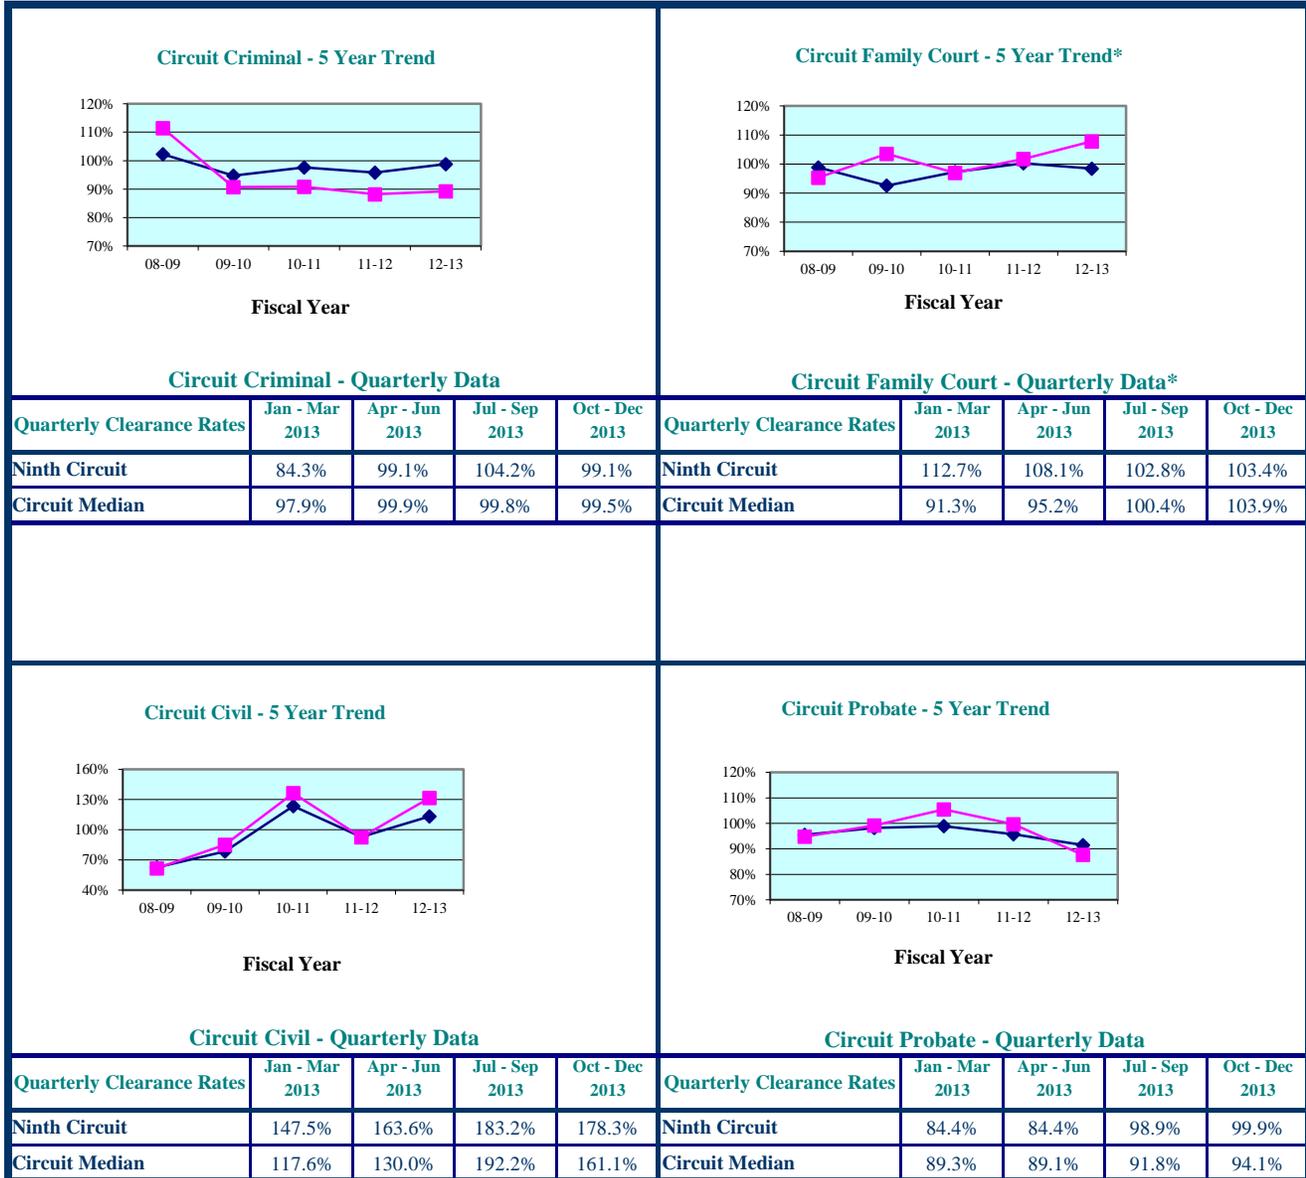

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Ninth Circuit	103.8%	97.2%	87.6%	96.4%
State Median	92.5%	96.7%	88.4%	96.0%

**Traffic data is not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

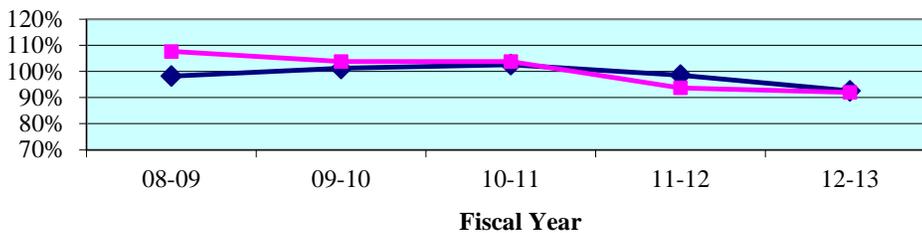

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Notes:

1. Traffic data is not included in calculations.
2. Fiscal years 2008-09 to 2011-12 were extracted from a static data base and represent the official trial court statistics. Fiscal year 2012-13 and quarterly data for Jan-Mar 2013, Apr-Jun 2013, Jul-Sep 2013 and Oct-Dec 2013 were extracted from a dynamic data base and may be amended by the Clerk of Court.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

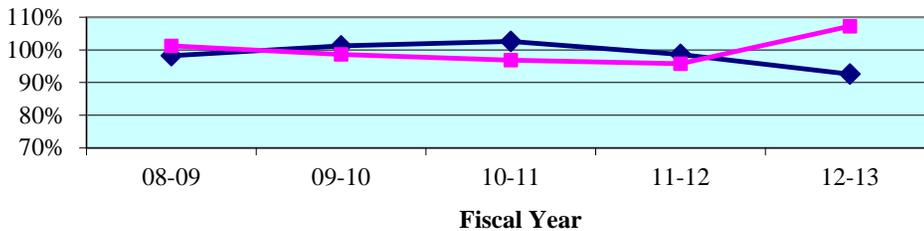

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Thirteenth Circuit	114.9%	115.8%	127.6%	122.0%
State Median	101.5%	105.9%	117.3%	115.6%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Notes:

1. Traffic data is not included in calculations.
2. Fiscal years 2008-09 to 2011-12 were extracted from a static data base and represent the official trial court statistics. Fiscal year 2012-13 and quarterly data for Jan-Mar 2013, Apr-Jun 2013, Jul-Sep 2013 and Oct-Dec 2013 were extracted from a dynamic data base and may be amended by the Clerk of Court.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

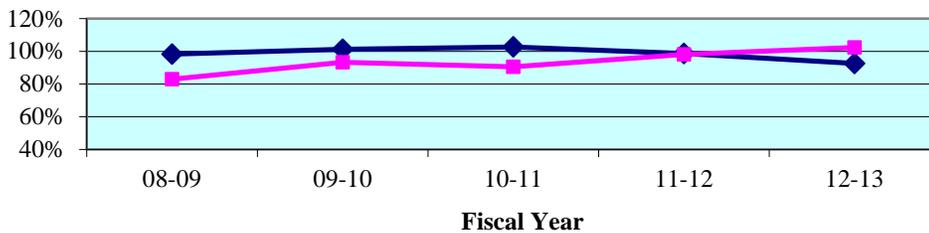

Circuit Court - Quarterly Data*

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

2. Fiscal years 2008-09 to 2011-12 were extracted from a static data base and represent the official trial court statistics. Fiscal year 2012-13 and quarterly data for Jan-Mar 2013, Apr-Jun 2013, Jul-Sep 2013 and Oct-Dec 2013 were extracted from a dynamic data base and may be amended by the Clerk of Court.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

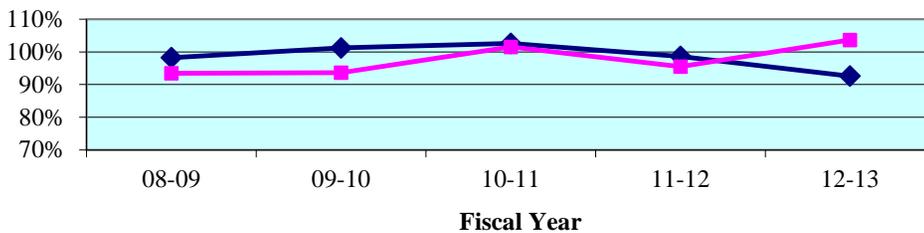

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

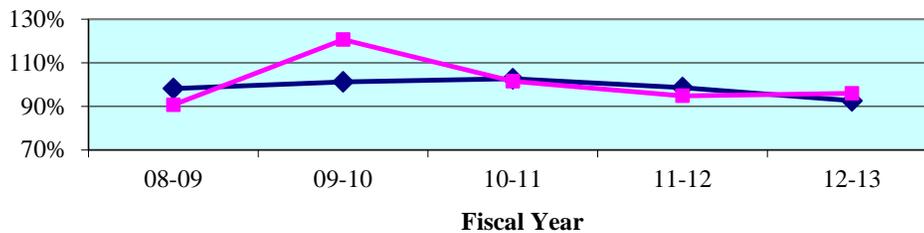

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jan - Mar 2013	Apr - Jun 2013	Jul - Sep 2013	Oct - Dec 2013
Twentieth Circuit	103.1%	116.5%	128.1%	123.5%
