

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

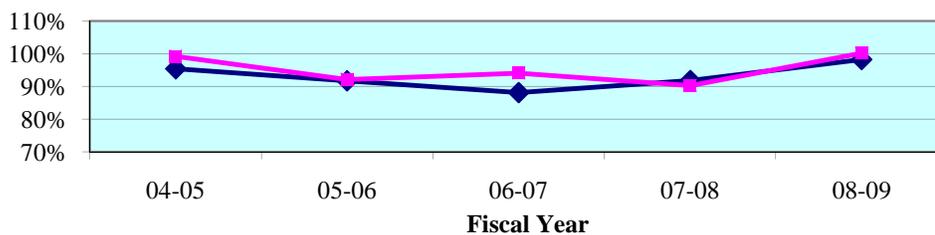

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
First Circuit	87.9%	85.8%	88.7%	86.3%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
First Circuit	95.1%	94.7%	120.5%	98.1%
State Median	93.6%	94.4%	98.7%	101.0%

**Traffic data is not included in calculations

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

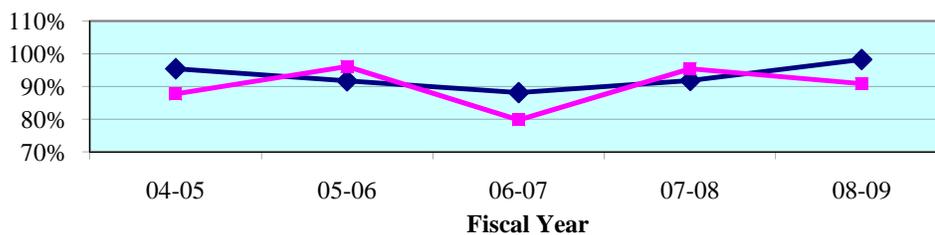

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Second Circuit	92.9%	89.1%	87.6%	89.9%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Second Circuit	86.7%	93.4%	100.5%	110.4%
State Median	93.6%	94.4%	98.7%	101.0%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

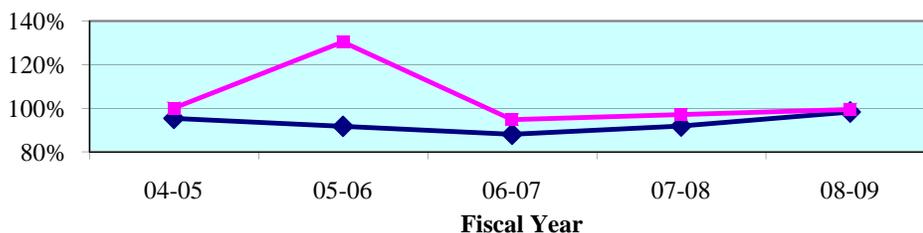

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Third Circuit	87.8%	84.3%	81.5%	82.1%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Third Circuit	99.6%	108.0%	140.3%	136.1%
State Median	93.6%	94.4%	98.7%	101.0%

**Traffic data is not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

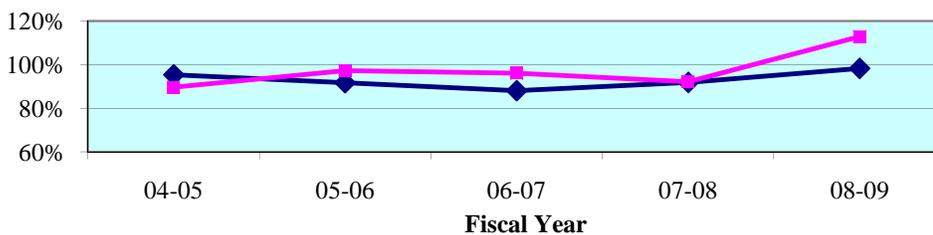

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Fourth Circuit	88.3%	89.1%	87.7%	87.2%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

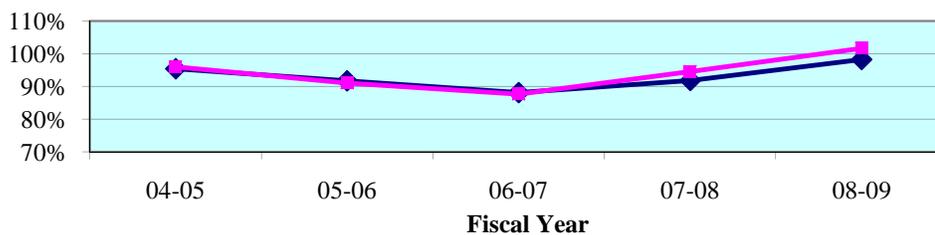

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Sixth Circuit	86.1%	83.7%	86.3%	88.4%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

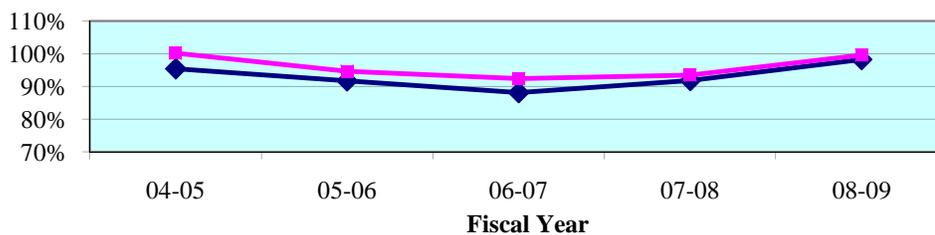

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

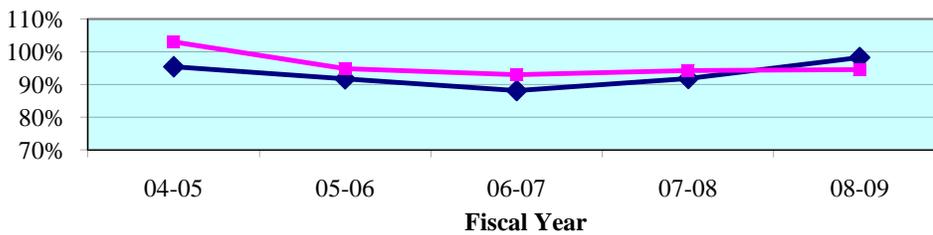

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Eighth Circuit	94.9%	86.5%	90.3%	86.0%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

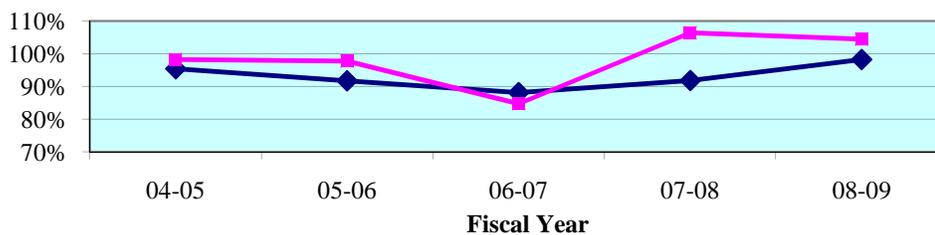

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Ninth Circuit	82.7%	84.3%	86.3%	97.2%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

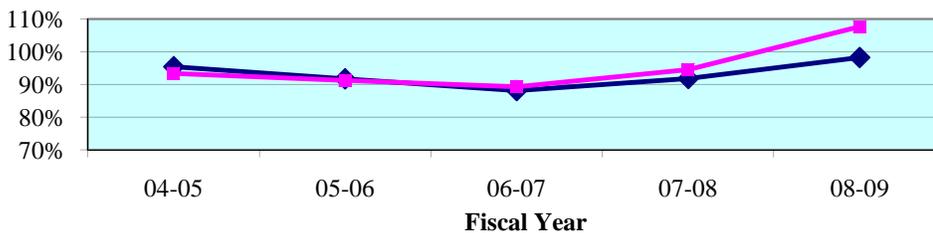

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

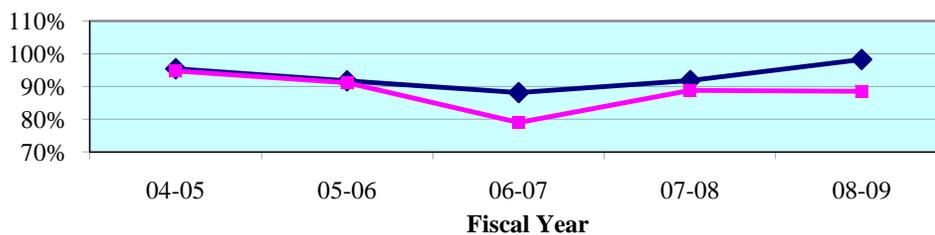

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

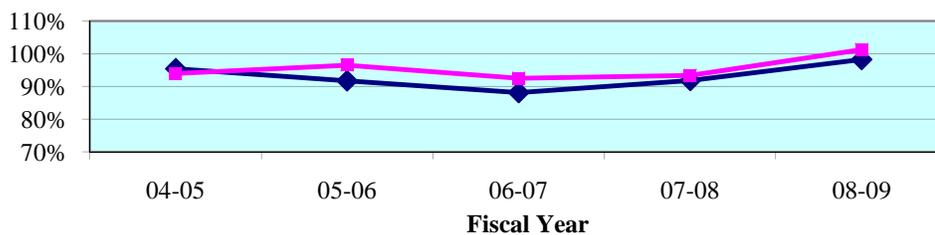

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Fourteenth Circuit	83.8%	77.9%	83.7%	75.4%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

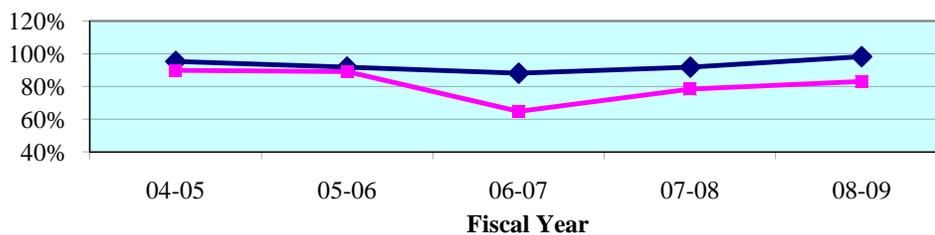

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Fifteenth Circuit	65.5%	71.6%	70.0%	79.6%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

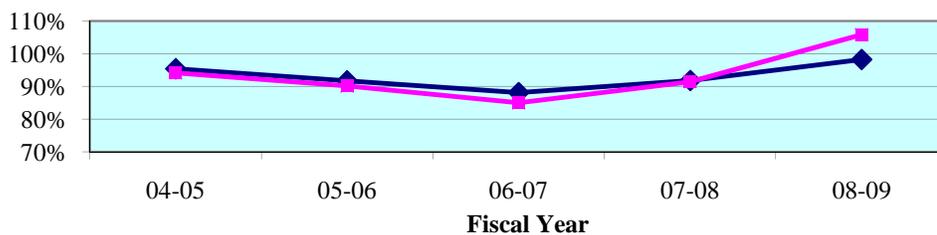

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Eighteenth Circuit	73.8%	71.0%	76.7%	72.1%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

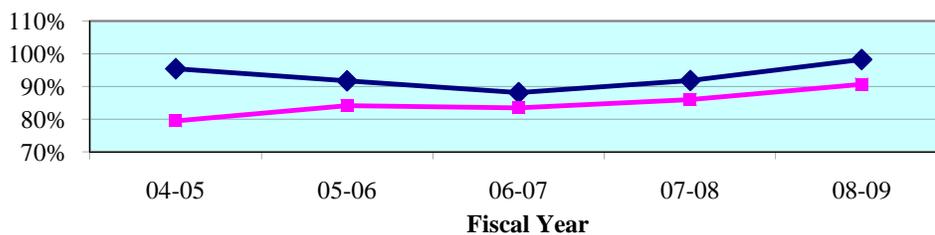

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Nineteenth Circuit	89.0%	86.9%	86.2%	72.3%
State Median	85.6%	84.6%	86.2%	86.4%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

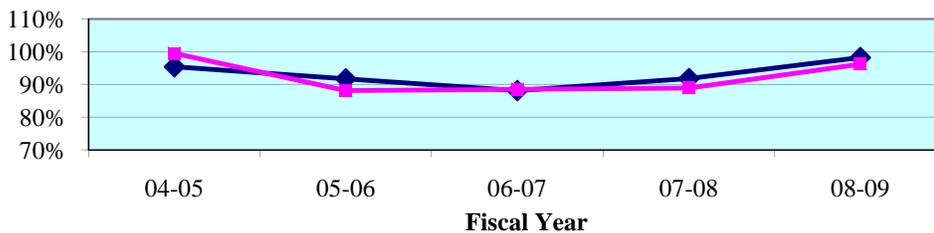

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2009	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010
Twentieth Circuit	90.2%	91.1%	100.0%	111.0%
