

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

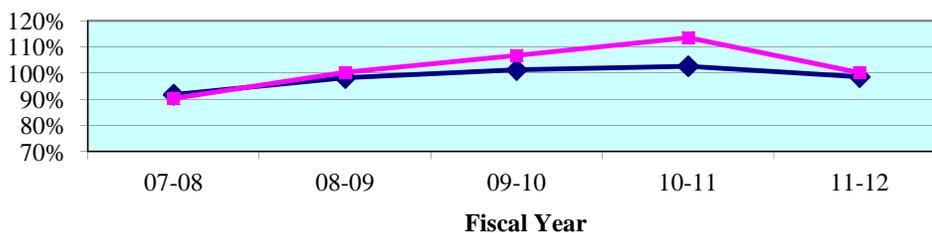

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
First Circuit	108.6%	91.1%	96.2%	93.0%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
First Circuit	99.3%	98.8%	106.1%	85.8%
State Median	94.6%	91.9%	92.8%	91.3%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

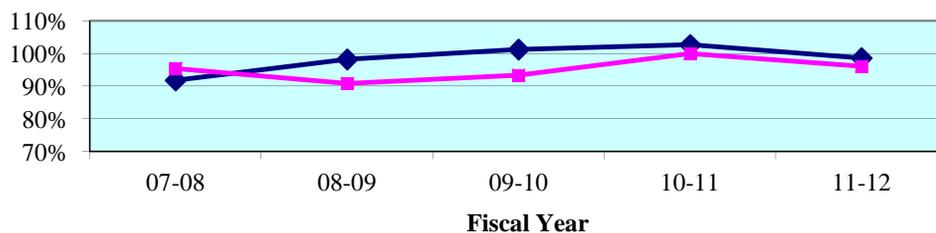

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Second Circuit	98.9%	92.7%	103.4%	107.0%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

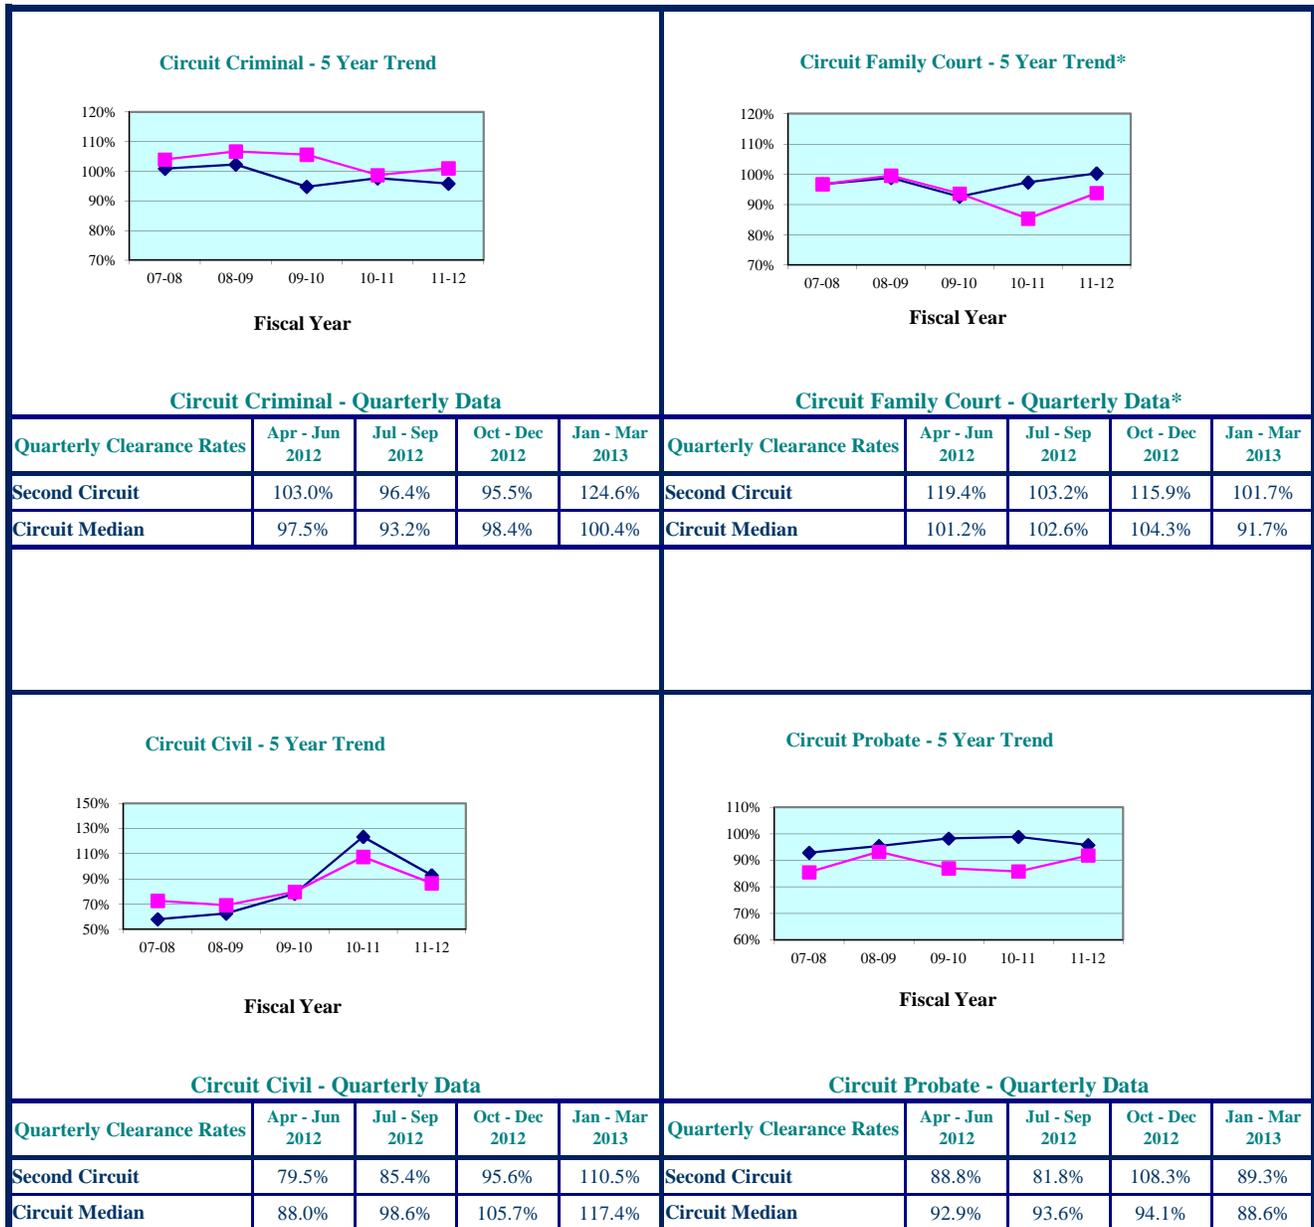

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

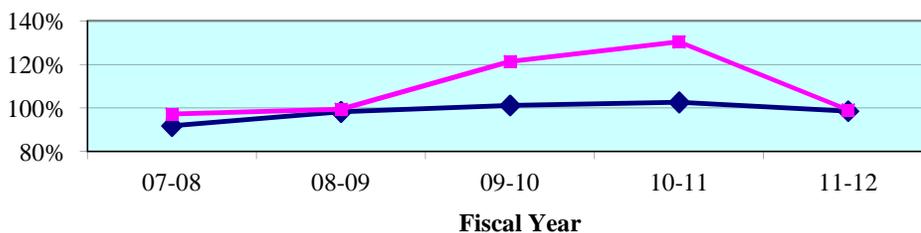

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Third Circuit	88.7%	79.5%	82.7%	79.8%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

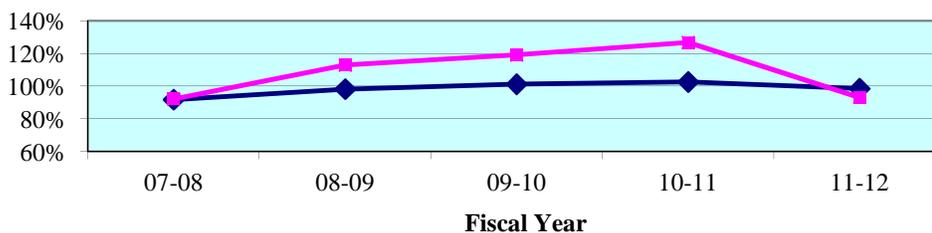

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Fourth Circuit	81.4%	98.6%	96.8%	95.4%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

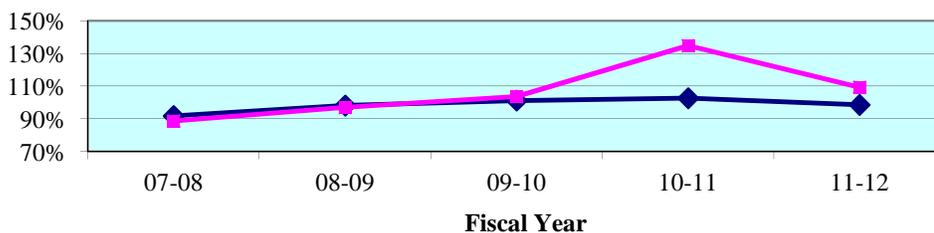

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Fifth Circuit	92.1%	93.7%	101.1%	98.9%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

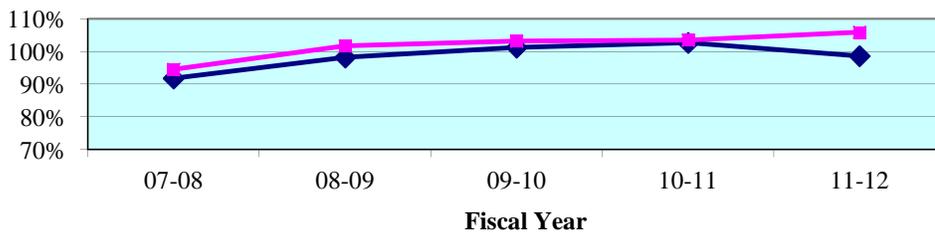

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Sixth Circuit	100.8%	97.1%	104.4%	95.8%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

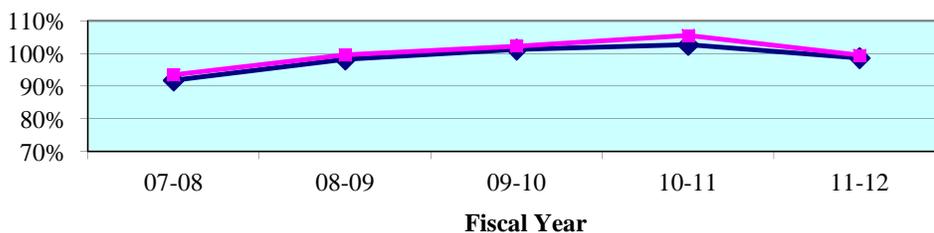

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Seventh Circuit	87.6%	92.9%	96.3%	89.1%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

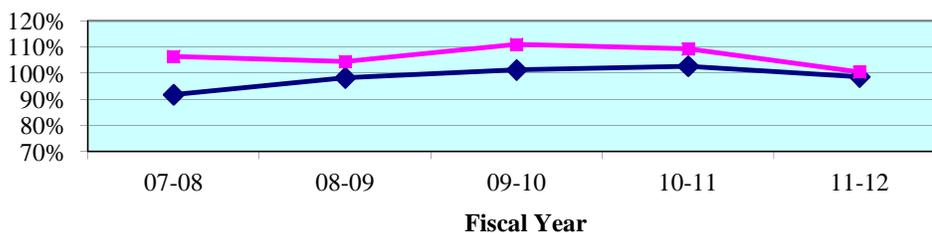

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Ninth Circuit	95.0%	96.5%	107.1%	114.4%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

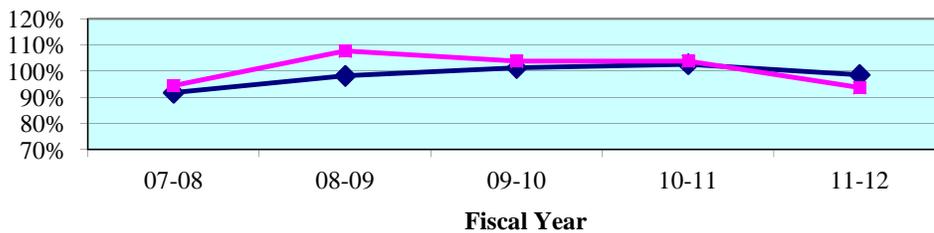

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Eleventh Circuit	112.2%	101.2%	127.4%	125.4%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

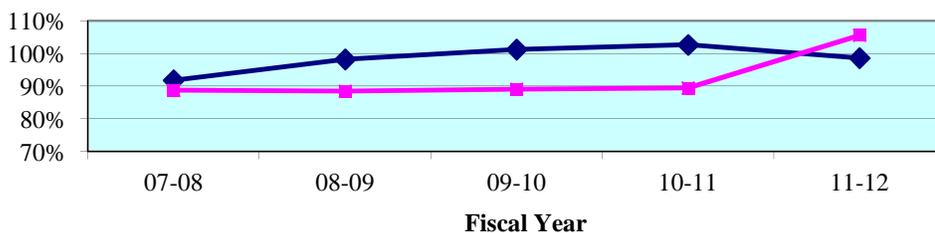

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Twelfth Circuit	94.8%	98.3%	111.0%	101.6%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

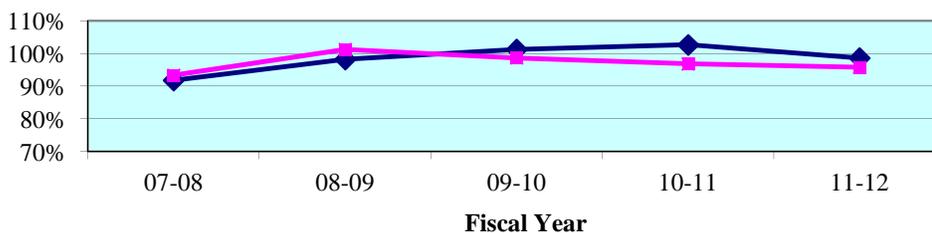

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013

Notes:

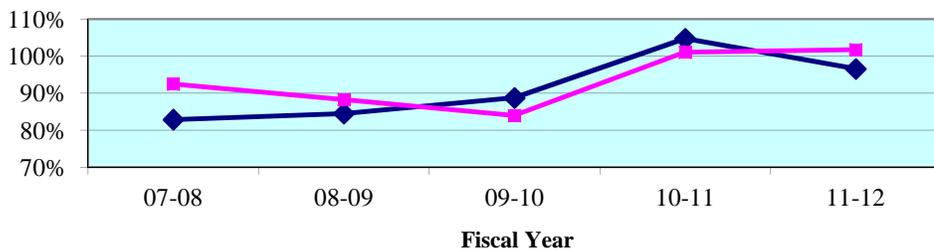

1. Traffic data is not included in calculations.
2. Fiscal years 2007-08 to 2011-12 and Apr-Jun 2012 were extracted from a static data base and represent the official trial court statistics. Quarterly data for Jul-Sep 2012, Oct-Dec 2012, and Jan-Mar 2013 were extracted from a dynamic data base and may be amended by the Clerk of Court.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

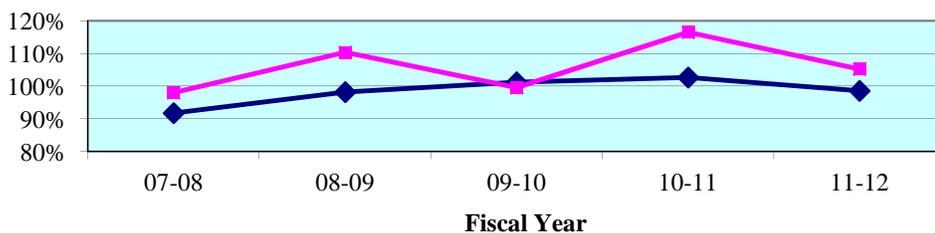

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Fourteenth Circuit	101.4%	99.8%	110.5%	98.0%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Fourteenth Circuit	125.5%	100.1%	88.4%	72.7%
State Median	94.6%	91.9%	92.8%	91.3%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

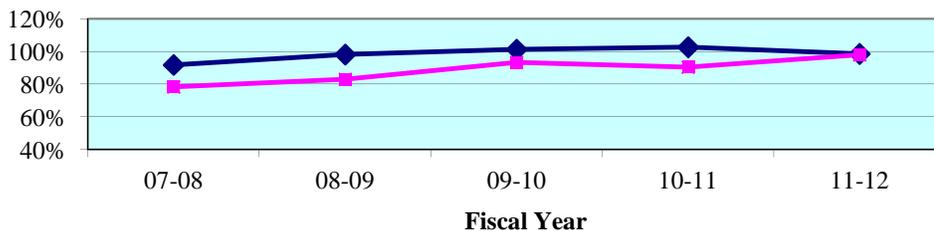

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Fifteenth Circuit	93.3%	105.6%	113.3%	103.8%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

- Fiscal years 2007-08 to 2011-12 and Apr-Jun 2012 were extracted from a static data base and represent the official trial court statistics. Quarterly data for Jul-Sep 2012, Oct-Dec 2012, and Jan-Mar 2013 were extracted from a dynamic data base and may be amended by the Clerk of Court.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

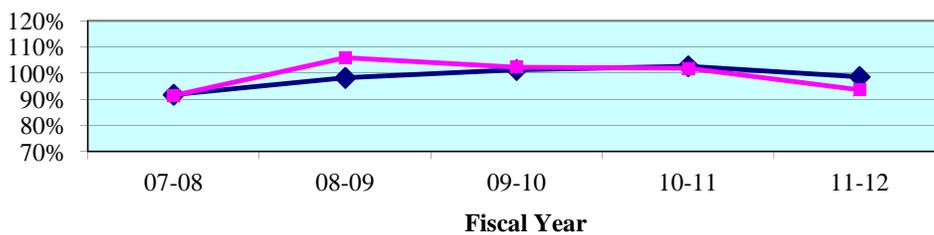

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Eighteenth Circuit	88.7%	94.0%	98.8%	103.1%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

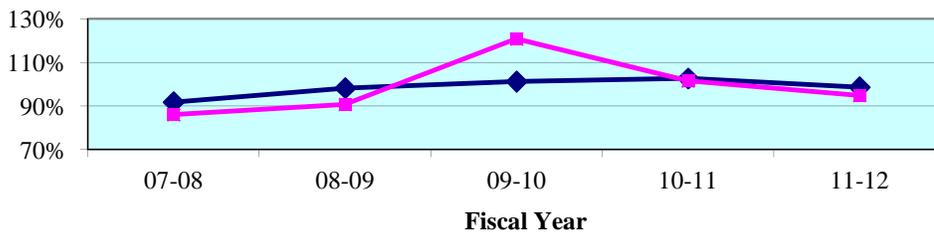

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Apr - Jun 2012	Jul - Sep 2012	Oct - Dec 2012	Jan - Mar 2013
Nineteenth Circuit	101.4%	112.6%	122.5%	109.7%
State Median	96.5%	97.6%	105.0%	100.9%

*Termination of Parental Rights petitions are included in calculations from January 2010 forward.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*
