

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

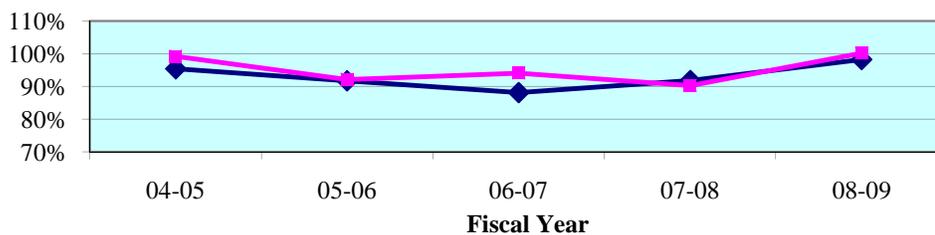

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
First Circuit	85.9%	88.8%	86.3%	92.6%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
First Circuit	94.8%	120.6%	97.8%	116.6%
State Median	94.4%	98.4%	99.7%	106.0%

**Traffic data is not included in calculations

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

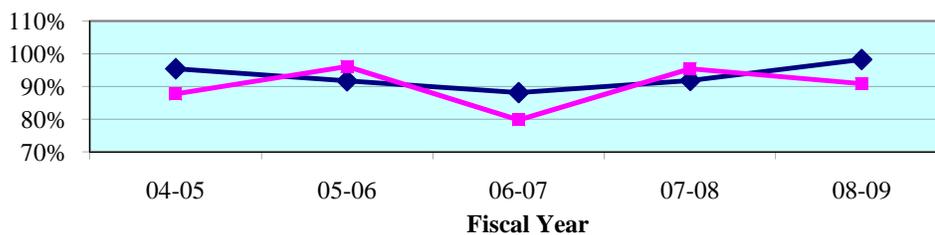

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Second Circuit	89.1%	87.5%	88.8%	97.6%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

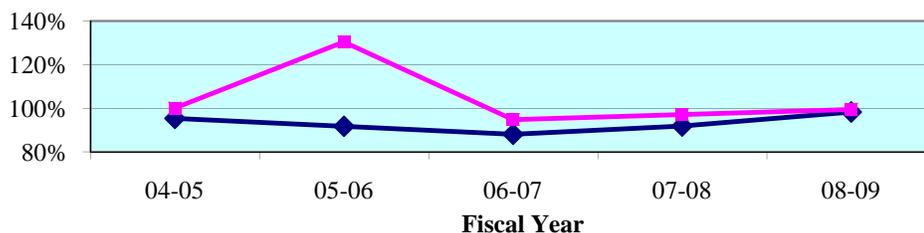

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Third Circuit	84.3%	81.7%	82.3%	87.2%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

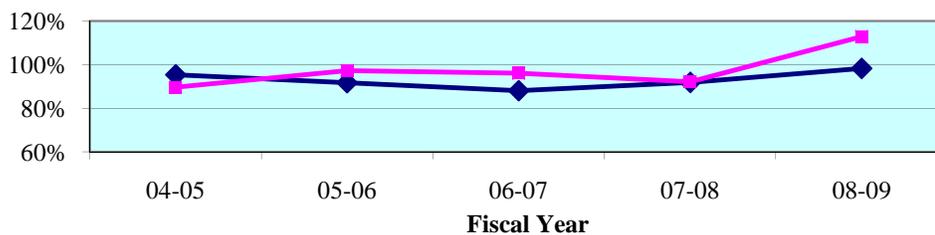

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Fourth Circuit	89.1%	87.7%	87.2%	100.2%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

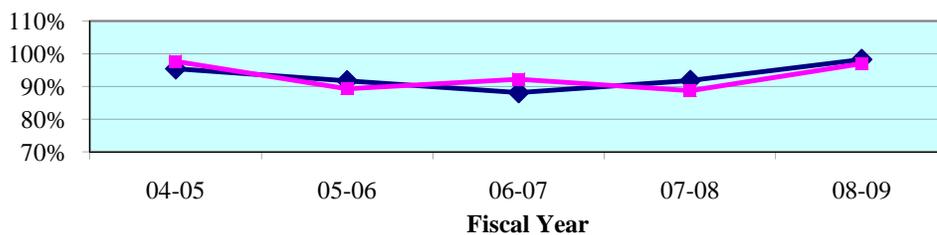

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Fifth Circuit	86.6%	88.4%	86.5%	99.7%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Fifth Circuit	91.6%	90.9%	117.7%	116.6%
State Median	94.4%	98.4%	99.7%	106.0%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

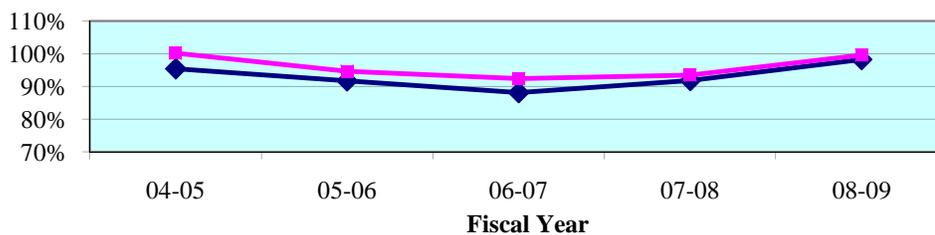

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Eighth Circuit	86.4%	90.2%	85.9%	87.5%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

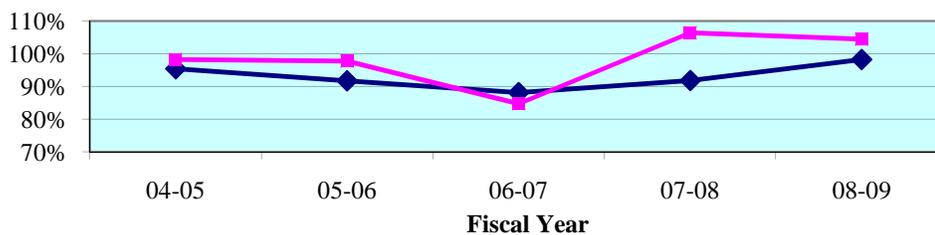

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Ninth Circuit	84.3%	86.3%	96.9%	123.8%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Ninth Circuit	106.6%	104.0%	131.2%	118.9%
State Median	94.4%	98.4%	99.7%	106.0%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

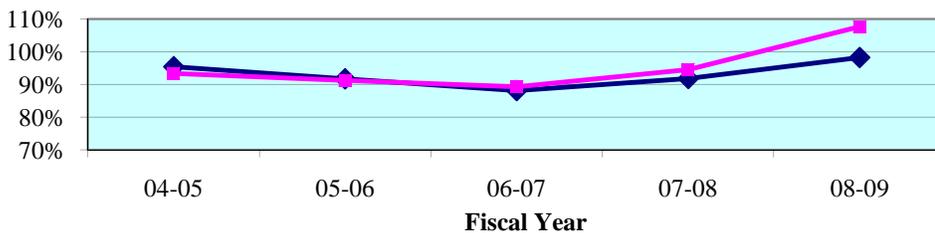

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Tenth Circuit	91.9%	97.6%	90.4%	98.8%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

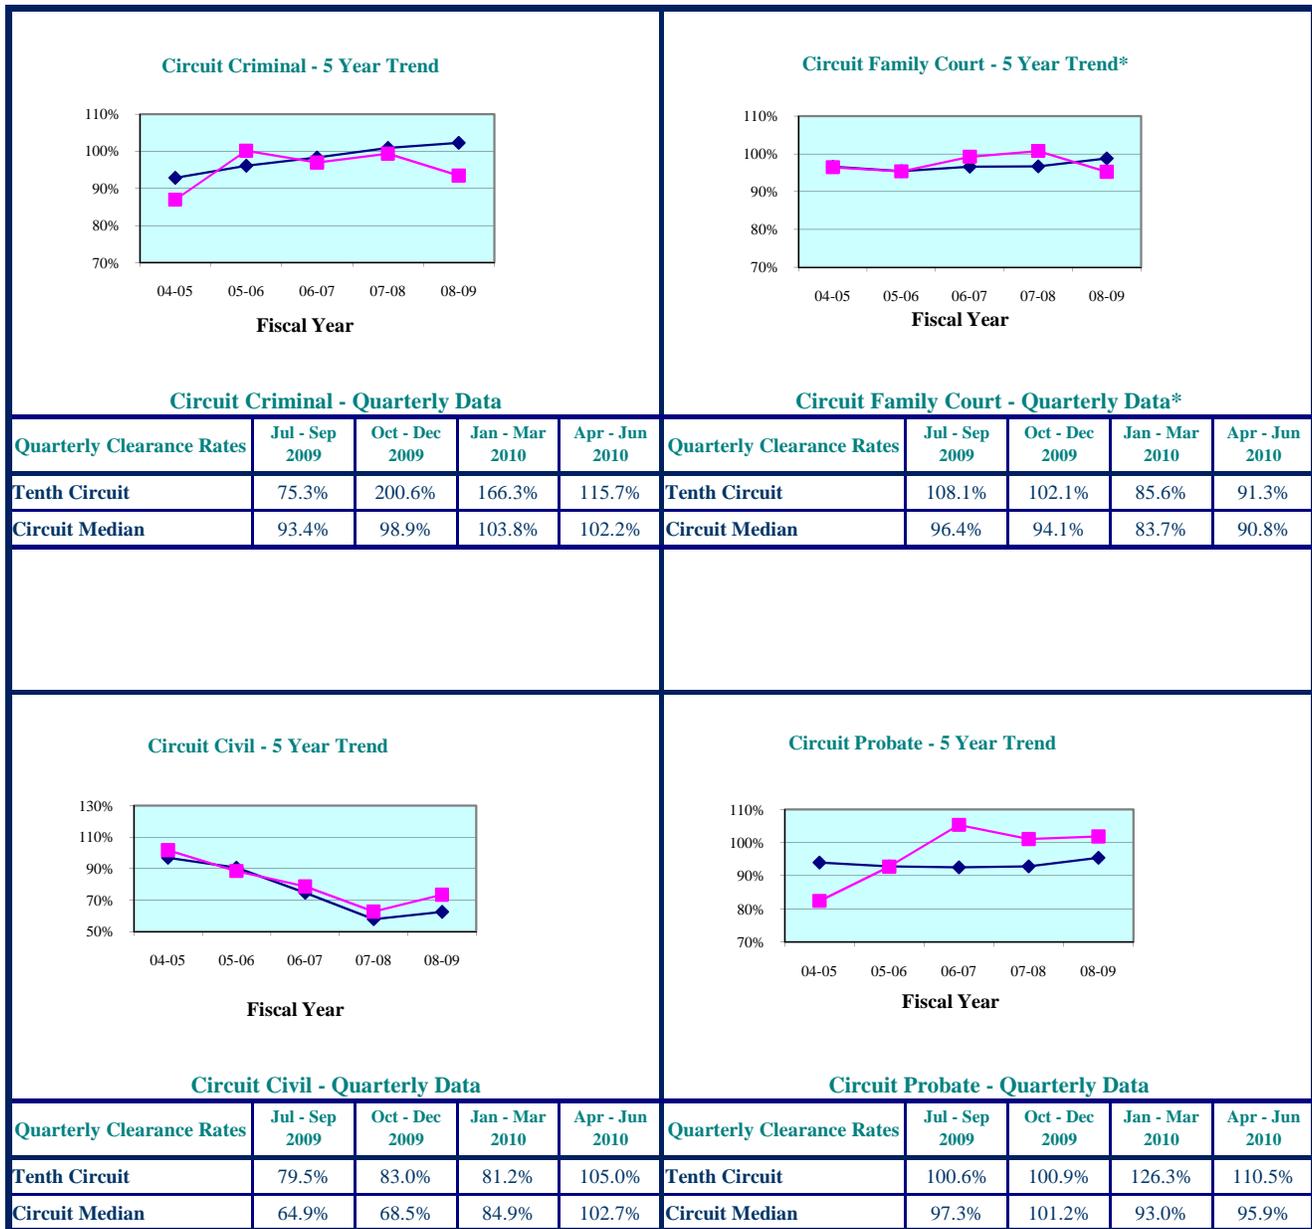

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Tenth Circuit	107.0%	100.3%	82.3%	102.2%
State Median	94.4%	98.4%	99.7%	106.0%

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

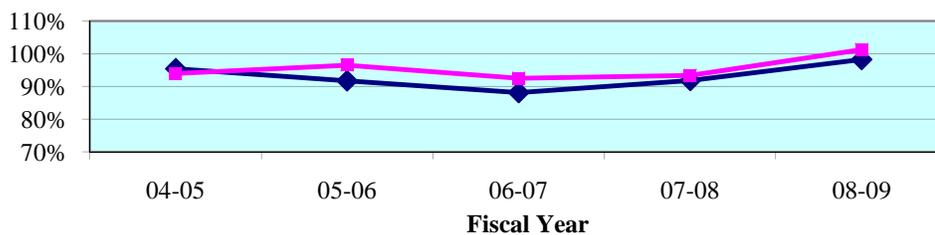

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Fourteenth Circuit	77.1%	83.4%	75.4%	94.2%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

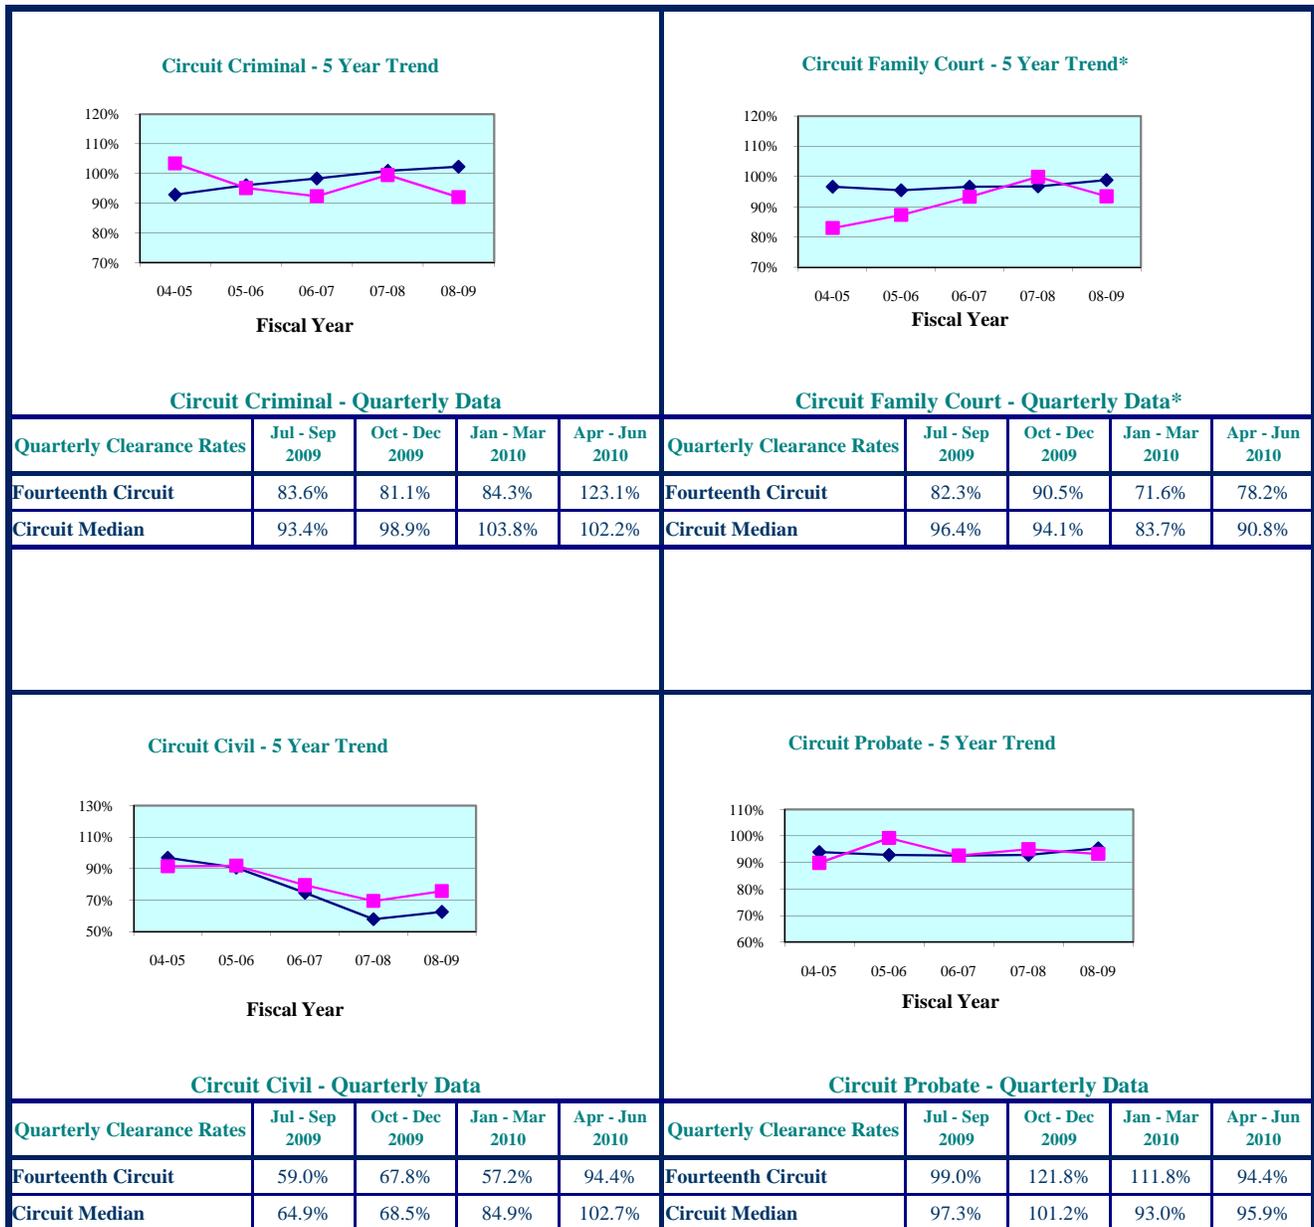

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Fourteenth Circuit	98.6%	133.0%	61.5%	121.2%
State Median	94.4%	98.4%	99.7%	106.0%

**Traffic data is not included in calculations.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Notes: Traffic data is not included in calculations.

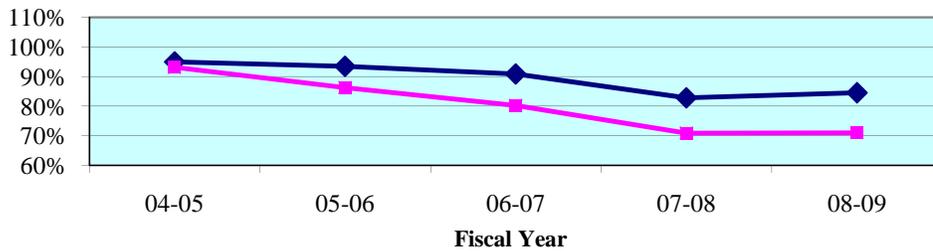

Fiscal year data were extracted from a static data base and represent the official trial court statistics. Quarterly data were extracted from a dynamic data base and may be amended by the Clerk of Court.

Clearance Rate -

The clearance rate is an indicator of whether a court is "keeping up" with its incoming caseload. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases a month and disposed of 900 cases during the same month, the clearance rate for that month is 90 percent. If a court's clearance rate is continually less than 100 percent over an extended period of time, the court will develop a backlog.

Clearance rates statistically tend to be more volatile when measured over shorter time periods. They should be compared over a period of five or more years to identify trends. There are many factors that can affect a court's clearance rate, including the number of filings, judicial assignment practices, case management resources and practices, trial rates, and reporting errors. Court managers may want to investigate these factors to identify the source(s) of a questionable clearance rate point or trend.

Circuit Court - 5 Year Trend*

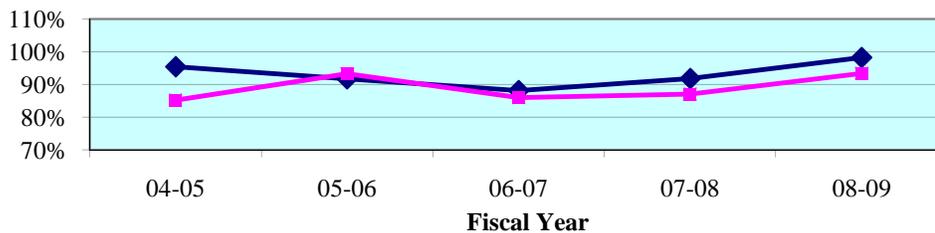

Circuit Court - Quarterly Data*

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Twentieth Circuit	91.2%	100.2%	111.7%	116.5%
State Median	84.6%	86.2%	86.4%	96.2%

*Termination of Parental Rights petitions are not included in calculations.

County Court - 5 Year Trend**

County Court - Quarterly Data**

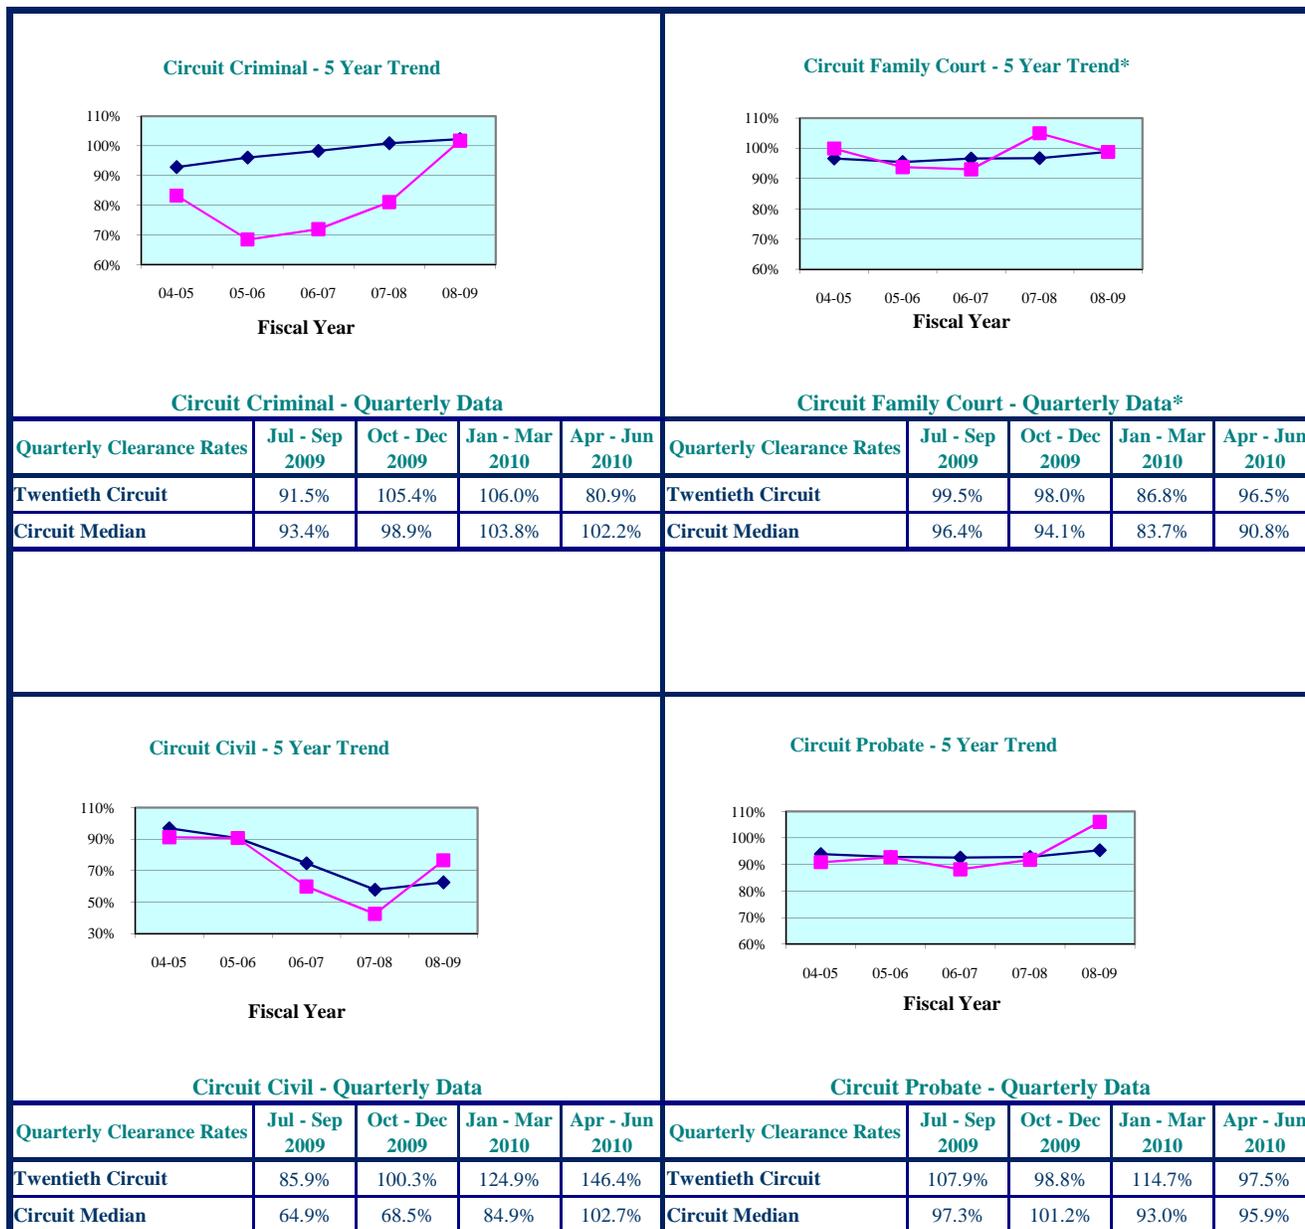

Quarterly Clearance Rates	Jul - Sep 2009	Oct - Dec 2009	Jan - Mar 2010	Apr - Jun 2010
Twentieth Circuit	94.0%	84.1%	100.0%	105.3%
State Median	94.4%	98.4%	99.7%	106.0%

**Traffic data is not included in calculations.
